

KATHMANDU MODEL COLLEGE

KMC

Bagbazar, Kathmandu

Mid-term Examination – 2082

Bachelor in Computer Applications

Full Marks: 60

Course Title: C Programming

Pass Marks: 30

Code No.: CACS151

Time: 3 Hours

Semester: II

Date: 17th Asar 2082, Tuesday

Student's Full Name:

Student ID No.:

Candidates are required to answer the questions in their own words as far as practicable. The figures in the margin indicate the full marks.

Group A

Attempt ALL the questions. [10×1=10]

1. Circle (O) the correct answers

i. What is the purpose of a language processor?

- a) To execute programs directly
- b) To convert programs from one form to another
- c) To design user interfaces
- d) To debug programs automatically

ii. Which technique uses function calls to solve problems by breaking them into smaller instances?

- a) Iterative
- b) Recursive
- c) Deterministic
- d) Non-deterministic

iii. Which of the following is NOT a characteristic of good modular design?

- a) High cohesion
- b) Low coupling
- c) Large module size
- d) Clear interfaces

iv. Which of the following is NOT a valid C token?

- a) Keyword
- b) Identifier
- c) Operator
- d) Sentence

v. What is the range of the 'int' data type in a 16-bit system?

- a) -128 to 127
- b) -32768 to 32767
- c) -2147483648 to 2147483647
- d) 0 to 65535

vi. Which escape sequence represents a newline character?

- a) \t
- b) \n
- c) \r
- d) \b

vii. What is the output of the following code?

```
int x = 5;  
printf("%d", x++ * 2);
```

- a) 10
- b) 11
- c) 12
- d) 18

viii. Which function reads a single character from the keyboard without waiting for Enter key?

- a) getchar()
- b) getche()
- c) gets()
- d) scanf()

ix. What is the output of the following code?

```
int x = 10;  
if (x = 5)  
    printf("True");  
else  
    printf("False");
```

a) True

b) False

c) Error

d) No output

x. Which loop executes at least once regardless of the condition?

a) for

b) while

c) do-while

d) switch

“BEST OF LUCK”
