

KATHMANDU MODEL COLLEGE

KMC

Bagbazar, Kathmandu

Mid-term Examination – 2082

Bachelor in Computer Applications

Course Title: C Programming

Code No.: CACS151

Semester: II

Date: 17th Asar 2082, Tuesday

Full Marks: 60

Pass Marks: 30

Time: 3 Hours

Candidates are required to answer the questions in their own words as far as practicable. The figures in the margin indicate the full marks.

Group B

Attempt any SIX questions. [6×5=30]

2. What are keywords? Explain the compiling process of a C program. (1+4)
3. What is the purpose of the size of operator? Write the C program to swap the value of two integers without using the third variable. (2+3)
4. Write the C program to find all the possible roots of the quadratic equation $ax^2 + bx + c = 0$.
5. Define format specifier with examples. Write the C program to check whether the enter number is prime or composite.(1+4)

6. Define data types.Explain its types. Write the C program which display the average and sum of n numbers input by the user.(1+1+3)
7. What is a software process model? Differentiate between cohesion and coupling in programming with examples. (1+4)
8. What are the characteristics of the good program? Write the program to calculate the compound interest for the given principal amount, number of years and rate of interest. (2+3)

Group C

Attempt any TWO questions. [2×10=20]

9. What do you mean by the software development life cycle? Explain waterfall models and iterative models with their advantages and disadvantages.(2+4+4)
10. is the break keyword necessary in switch statements? Write the program to calculate the basic arithmetic operations (+, -, *, /) using switch case statement. (2+8)
11. What do you mean by looping? Explain while loop with suitable example. Compare while loop with do while loop. Write a program to read the input number and display the sum of each digit of the number.(1+2+3+4)

“BEST OF LUCK”
